

6D

The 6D is a small, light, and rugged portable, self-contained Laskin-Nozzle aerosol generator. It is ideal for testing a wide variety of filter systems with airflows up to 2,000 cfm by generating a poly-dispersed, sub-micron aerosol. Applications include workstations, negative- pressure filtration units, biological safety cabinets, ceiling modules and more. It can also be used for testing positive pressure systems using an optional hose adapter. On-site routine maintenance is easy. And its integrated compressor makes implementation simple – all you need is a power source.

APPLICATIONS

- ✓ Independent Filter Certifiers
- ✓ Pharmaceutical Manufacturers
- ✓ Medical Facilities and Cleanrooms

A tough, portable solution

The 6D is a small, light, and rugged portable, self-contained Laskin-Nozzle aerosol generator. It is ideal for testing a wide variety of filter systems with air flows up to 2,000 cfm by generating a poly-dispersed, sub-micron aerosol. Applications include workstations, negative-pressure filtration units, biological safety cabinets, ceiling modules, and more. The 6D can also be used for testing positive pressure systems using an optional hose adapter. On-site routine maintenance is easy. And its integrated compressor makes implementation simple – all you need is a power source.

6D aerosol output is monitored by a standard issue calibrated pressure gauge; guaranteeing the correct pressure across the nozzle as specified in industry standards. The 6D complies with all applicable electrical and safety requirements and is supplied standard with the CE mark. Integrated liquid fill sight glass, drain port, and optional power cord storage make operating, transporting, and storing the 6D simple and easy.

A hose adapter kit, used to introduce aerosol remotely, connects easily to the standard outlet using the sanitary flange or simple FNPT connection.

PRODUCT SPECIFICATIONS	
Aerosol Output Range	50 - 2,000 cfm
Aerosol Concentration	100 ug/l @ 200 cfm / 10 ug/l @ 2,000 cfm
Generator Type	2 or 6 Laskin nozzle jets (1/2 or 1-1/2 Laskin nozzles)
Aerosol Type	Polydisperse (Cold)
Size	14-1/2" L x 10" W x 9" H (37cm L x 26cm W x 23cm H)
Weight	34lbs (15kg)
Electrical	110VAC/60 Hz or 220VAC/50Hz
Compressed Air	Not Required. On-Board, Integral Compressor
