

Portable Fogger, DI Water Fogger, Battery Operated, 4cfm –

The patented, hand-held Portable Fogger was developed for users that require totally portable visible vapor generation. Many foggers sold today use phrases such as portable and ultrapure fog, but small size alone does not make a tool totally portable or ultrapure. This battery powered, hand-held, on-demand, ultrasonic DI Water fogger meets the criteria as a portable fogger.

Applications

- Cleanroom laminar flow testing
- Barrier Isolator air flow testing
- Wet bench exhaust optimization
- Process equipment ventilation testing
- Personal safety exhaust verification
- Pressure balancing between rooms and spaces

Trigger Mode of Fogging Continuous Mode of Fogging

Portable CleanRoom Fogger, Fog-Gun™ Smoke Generator Features

- Portable and Lightweight
- No external cords required
- Ergonomic
- 6 ft. hose for remote fogging
- Transducer life: 10,000 hours
- Built-in level sensor to protect transducers
- Built-in tilt sensor to protect circuitry
- Two speed fan for On Demand Fog
- Trigger bypass switch for remote fog use
- Belt clip for easy transportation

- Patented Labyrinth design to prevent water leakage

Notes:

1. The fog generated by this device contains microscopic droplets of DI water. **AVOID USING IN IMMEDIATE VICINITY OF ELECTRICAL APPLIANCES, WATER SENSITIVE PRODUCTS AND EQUIPMENT.**

Specifications

| | |
|---------------------------------------|--|
| Dimensions | 10" x 7" x 11.5" (254 x 178 x 292) |
| Weight (including water) | 5.2 lbs. (2.36 kg) |
| Liquid capacity | 300ml |
| Fog life, Fog Distance, Fog Volume | 30-40 minutes, 3 feet distance (0.9m), 3cfm fog volume |
| Battery life | ~40 minutes |
| Battery Charging Time | 6-8 hours |
